

DISPOSAL & RECYCLING OF USED TURNOUTS AND TRACK MATERIAL

Sustainable turnout management

Description

As part of the just-in-time delivery of fully pre-assembled new turnouts using tilting wagons, the used turnouts are disposed. With this step, we complete the cycle and support our clients throughout the duration of the entire product life cycle of a turnout.

The reusable turnout switches are professionally dismantled and recycled in the factory.

At the factory,

- » Expert dismantling and recycling of the reusable switch components takes place.
- » Recycled switches are mainly used in areas with less traffic and provide cost-effective, or temporary solutions.
- » In addition to the positive effects on the environment, route availability and economy are significantly increased as a result of the shorter assembly times, and costs for using reusable switch components are reduced.

Benefit to the customer

- » Shorter disassembly time
- » Quick removal of the turnouts from the site
- » Ease of handling of returns by means of WTW
- » Cost reduction for the customer
