

KS-TYPE RAIL FASTENING SYSTEM FOR WOODEN SLEEPERS

07-2023/V1

Description

KS-type fastening system is a classic screw rail fastening system.

It is used on wooden sleepers around the world and connects a sleeper to a ribbed plate.

Rail seat pad is mounted under the rail foot.

The rail is fixed using the SKL12 clip.

Technical aspects of KS-type system

- » provides proper insulation between the rail foot and the sleeper
- » SKL12 clip is used instead of standard κ p2 clips
- » electrical resistance $\geq 5 \text{ k}\Omega$.
