

zentrak for Asset and Maintenance Management

Turning asset data into value

zentrak - Asset and Maintenance Management is the leading software for managing your assets over the entire lifecycle. By monitoring and analyzing fixed asset and rolling stock data, decisions can be made based on data combined with experience. This is fundamental for data-driven asset decisions (investments, improvements) and a dynamic maintenance strategy.

That's how we increase your digital performance on track.

Why?

- » Structured pathway to asset digitalization
